

Nurses Conference 25 - 26 July 2024

2024

We warmly invite you to participate in our upcoming conference.

In the future it is said that lighting is expected to be increasingly used to promote the health and well-being of the occupants of spaces. The technical term used for this new trend, is biophilic lighting - a term that refers to incorporating the healing characteristics of the natural elements of nature such as sunlight, green plants, or water.

While all our healthcare and educational institutions are not yet able to do so, we are aware that good nurses and teachers can contribute to the well-being of their clients.

Take up your torch and join us at the CSIR International Convention Centre, Pretoria for our annual Lighting the Future Conference for nurses and midwives where we will work together towards a better tomorrow for our patients and students.
