

CLINICAL INSIGHTS

A Multidisciplinary approach to treating Plaque Psoriasis in 2024

TUESDAY
23 July 2024
[SAST]
18:00 TO 19:00

The webinar on plaque psoriasis explores the efficacy, clinical trial and real-world evidence of biologic therapy. It provides an overview of plaque psoriasis, detailing its impact and pathophysiology.

Biologic therapy is discussed in-depth, covering mechanisms of action and effectiveness in symptom management. Real-world evidence from observational studies and patient registries offers insights into long-term outcomes and safety profiles.

Treatment guidelines are aligned with real-world insights to guide clinical decision-making. Patient perspectives enrich the discussion with firsthand experiences. Safety considerations emphasize vigilant patient management. The webinar concludes by addressing future directions and emerging therapies.
